## THOROUGHbred POULTRY.

If you want good honest value in breeding stock, we can usually supply same from good reliable poultry men with whom we have arranged for stock. We do not keep these fowls on hand; thus, it is impossible to fill orders as promptly as we desire. Nearly all of our breeders are located in the country, therefore, when we receive your order it is necessary to write a letter and it is usually a day before he receives it, and another day before he can deliver the birds to us. Thus, it can easily be seen that it takes three days before we can fill your order.

In very cold weather it is sometimes necessary to hold the birds for a day or so until the weather moderates, as it is dangerous to move valuable birds of the large comb breeds—such as Minorcas and Leghorns—in severe weather, on account of the danger of freezing their combs.

We are particularly careful about shipping birds. Our shipping coops are light but very substantially made and have a slatted top, allowing plenty of air, and taking a cheaper express rate than the canvas coops. Provision is made for feed and water.

During the breeding season, or from February 1st to May 1st, we try to have on hand a display of good cockerels at our store, but outside of this period it is impossible to do this, as the birds which are kept confined are bound to become weakened and sickly in time. The price of these birds depends much on the merit of each particular specimen; therefore, it is difficult to give exact prices in the catalogue.

We have some very choice stock to offer this season, both in males and females of most all breeds with exception of White Orpingtons. We will have a few good cockerels of this breed to offer, but practically no hens or pullets. White Orpingtons are still so very scarce in Colorado that our breeders refuse to sell their females.

We are prepared to offer birds of the commoner breed in any number and of any quality.

In writing for birds be sure to state whether you wish utility or show birds.

We are always glad to make quotations, so do not hesitate to inquire.

## EGGS FOR HATCHING.

We advertise all kinds of eggs for hatching, but please remember that we do not guarantee them. We secure our eggs from reliable and up-to-date breeders, and we have every reason to believe that they will run about 85% fertile, but on account of the amount of handling which they are bound to receive in our hands and in transit, we have found it necessary to withdraw any guarantee whatever. We regret very much that we find it necessary to do this, however we have decided it to be best for all parties concerned.

Please do not order Turkey, Duck and Geese Eggs too early. Turkeys and Ducks do not usually start laying in this locality much before March 15th, and as the first eggs are never the best, we think the first of April is plenty early.

Orders for one and two settings are packed in Anderson Egg Boxes. Each egg has a compartment, and is carefully protected by layers of corrugated paper. Larger lots are packed in baskets.

All eggs must go via Express. We send a notice by mail the same day that the express shipment is made, advising customer of same.

No goods sent C. O. D.

**AUTOMATIC MOISTURE DEVICE.**

This automatic moisture device is attached to the incubator heater (built previous to 1909), and the amount of moisture can be governed by the amount of surface exposed. This surface can be reduced from 36 to less than 3 square inches. Price, with 3 conductors, \$1.50, not prepaid; conductors, 3 for 10c; per doz., 30c, postpaid.

Automatic Moisture Device.

**PATENT GERMAN SPIRAL HYGROMETERS.**

These hygrometers are used in incubators to denote the humidity of the air in the egg-chamber. By the use of one of these hygrometers you can tell just what degree of moisture you have in the egg-chamber. Your hygrometer should register between 65 and 80 degrees, to secure a good hatch. No. 952, 3 in. dial, each, \$1.75, prepaid.

The use of an incubator hygrometer effectively lessens the percentage of chicks dying in the shell due very largely to improper moisture conditions. The illustration shows the correct position of the instrument in use taking the place of one egg in the egg tray, thus showing the conditions actually surrounding the eggs. Price, \$1.50, by mail, \$1.65. Extra wicks for same, each, 10c; per doz., \$1.00, postpaid.

**TYCOS HYGROMETER.**

**PEDIGREE EGG TRAYS.**

Barteldes Seed Co.  
Sirs:—I have been using the Barteldes' Poultry Foods and I am so well pleased with them. Will say I have sold \$163.70 worth of eggs and have only 100 hens. This amount of eggs has been laid and sold since March the 25th until August 30th this year, and there has been no record of what we used. This surely doubles any record made before using the foods. So this may be a benefit to some one in the poultry business. I live on a dry ranch in the mountains and am 17 miles south of Canon City. This is a true statement.

It contains all the necessary ingredients that a chick needs until it is two months old, and will prevent bowel trouble and all other chick complaints. It is used by most every poultry raiser in Colorado. We have never had a single complaint against it; everyone pronounces it a wonderful food. Put up in our own printed sacks.
